Goldman Sachs
Mumbai, Maharashtra, India

Dear Hiring Manager,

I am writing to express my interest in the Summer Analyst position with Goldman Sachs, as advertised. With a strong background in computer science and hands-on experience in programming, data analysis, and machine learning, I am eager to contribute to your esteemed firm's Asset Management and Private Investing division. During my academic journey at Shri Vishnu Engineering College for Women, I have honed my technical skills in Python, Java, SQL, HTML, CSS, and JavaScript. My internship at MOTIONCUT further enhanced my proficiency in web development, where I successfully developed dynamic projects and gained valuable insights into creating user-friendly interfaces.

I am particularly drawn to Goldman Sachs because of its reputation for excellence and innovation in investment management. I am excited about the opportunity to leverage my technical acumen and collaborate with your team to deliver data-driven investment strategies that drive long-term value for your clients.

Enclosed is my resume, which provides further details about my qualifications. I would welcome the opportunity to discuss how my skills and enthusiasm align with the goals of your Summer Analyst Program. Thank you for considering my application. I look forward to the possibility of contributing to Goldman Sachs.

Sincerely,

Anjali Pujala
